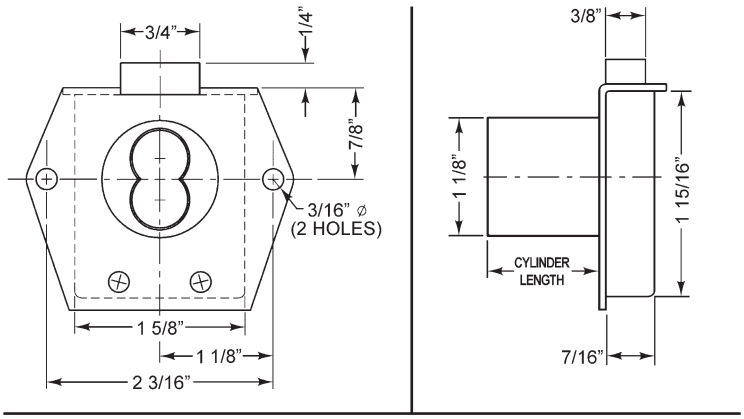
Note: Solid brass cylinder housing available in 26D and US4 finishes only.				

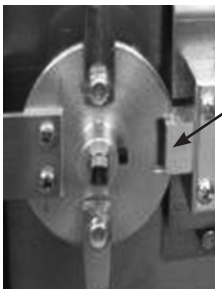
ENCLOSURE LOCK (SQUARE-STYLE, SPRING BOLT)



725RSL
(Square Latch) Standard configuration.
Dimensions are the same for all handings.

FOR METAL CABINETS/ENCLOSURES

Locking mechanism (inside of cabinet)



To open cabinet, bolt retracts allowing handle on outside to rotate disk, disengaging top and bottom latching mechanisms. When handle and disk are moved back into the closed position, bolt springs back into slot in disk and the cabinet is locked.
